

Background

The LTC RISE Program is a partnership between the Pennsylvania Department of Health (DOH), Pennsylvania Department of Human Services (DHS), Pennsylvania Emergency Management Agency (PEMA) and four healthcare organizations. Funding is provided by the U.S. Centers for Disease Control and Prevention (CDC) under the 2019 Epidemiology and Laboratory Capacity for Prevention and Control of Emerging Infectious Diseases (ELC) – Enhanced Detection Expansion (EDE) grant.

Core RISE 2.0 Activities

- Long Term Care facility workforce resiliency – promote long term care workforce professional development opportunities, including continuing education and leadership development, as well as practices that address staff physical and psychological well-being to optimize resident-centered care.
- Infection prevention and control and healthcare emergency preparedness – implement best practices to enhance delivery of resident-centered care based on what matters most to residents and their families and that supports residents' mobility and mentation.
- Sustainable outbreak response operation – maintain constructs that meet each facility's needs and build capacity through coordination of resources as well as engagement with the region and local community.
